Country-focused configuration

- Locales instead of languages
- Language codes like en-CA and es-MX
- Country code for path prefix

▽ Custom language

Language code: *

[es-MX]

RFC 4646 compliant language identifier. Language codes typically use a country code, and optionally, a script or regional variant name. *Examples: "en"*

Language name in English: *

[Mexico]

Name of the language in English. Will be available for translation in all languages.

Native language name: *

[Mexico]

Name of the language in the language being added.

Path prefix:

[mx]

Language code or other custom string for pattern matching within the path. With language negotiation set to *Path prefix only* or *Path prefix with langua* this language when the Path prefix value matches an element in the path. For the default language, this value may be left blank. **Modifying this valu** **should be used with caution in a production environment.** *Example: Specifying "deutsch" as the path prefix for German results in URLs in the for* /node".

Language domain:

[   ]

Language-specific URL, with protocol. With language negotiation set to *Domain name only*, the site is presented in this language when the URL accessi For the default language, this value may be left blank. **This value must include a protocol as part of the string.** *Example: Specifying "http://exam* as language domains for German results in URLs in the forms "http://example.de/node" and "http://de.example.com/node", respectively.

Direction: *

◉ Left to right

◯ Right to left

Direction that text in this language is presented.

(Add custom language)

Languages

Page caching

- Jose visits britney.com/ from Spain; Spanish content is served.

- britney.com/ is now cached in Spanish.

- Gábor visits britney.com/ from Hungary and gets served Spanish content.

WTF?

Custom module

- IP detection (geoip.module)
- redirect ALL requests without a language prefix
- rewrite outbound urls to minimize redirects

Issue: Cached pages returned in wrong language when browser language used

http://drupal.org/node/339958

How do I translate _____?

it depends…

Menu Translations

- Is it translatable directly?
- Is it translatable through i18n?
- Is it a language-specific menu?
